Dimensional Reference

Feature

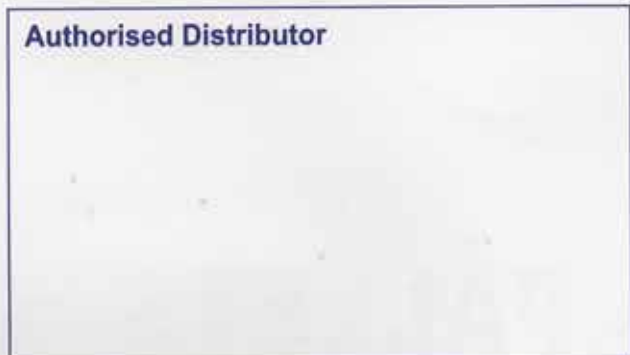

Advantages

100% hygienic	Plastic as a material is highly hygienic and does not rot/decay/decompose or react with material stored
Maintenance free	No problems of decay hence no need for protective coating as against wooden/metal pallets
Cost effective	Wooden pallets are low in initial costs only they break down, can be injurious and have short life span
100% rot proof	Does not decay or decompose and above all does not contaminate the materials handled
Compatible with all existing lifting systems	Compatibility ensures fast handling, saves time and lots of hidden cost
Robust design to render long Service	Scientifically designed for optimal performance and durability. They are light weight yet strong
Secure	Dimensionally stable design and highly safe for handling
Excellent resistance to most chemicals	Plastic does not react with most of the chemicals unlike wooden and metal pallets.
100% water proof	Water resistant due to inherent property of material, non-absorbent, reduces contamination
High impact strength and rigidity	Can withstand high levels of load and rough handling and stress free
Extensive testing to ensures quality standards	Stringent quality testing to ensure the toughest material handling needs
Easy to clean & wash	Plastic as a material is very easy to clean and maintain hygiene.

Available Colors

- ★ **Natural White / Grey / Red / Blue**
- ★ **We Undertake Custom Moulding for Specific Applications**
